Profile Summary

Dedicated and detail-oriented software engineer in designing, developing, and maintaining software applications. Proficient in multiple programming languages and frameworks, with a strong ability to solve complex problems and deliver high-quality solutions. Passionate about leveraging technology to improve processes and enhance user experiences

Professional Experience

Software Engineer Trainee - Semicolon Africa

February 2024 - Feb 2025

With a strong history of creating high-quality and efficient applications. Skilled in designing, building, and launching reliable software using modern tools like Java Spring Boot, Python Django, and Go Gin with GORM.

I have a lot of practical experience in developing and improving applications that use both traditional databases like MySQL and PostgreSQL, as well as NoSQL databases like MongoDB. I am also familiar with version control systems like Git and GitHub, which help keep the code organized and support teamwork in Agile environments.

I am recognized for my ability to tackle difficult technical problems, encourage new ideas, and apply best practices to improve product performance, security, and ease of maintenance.

Expertise, Tools and Areas of Interest

Software Engineering

Java
Python
Javascript
Next js
Nest js
Typescript
Go

Database

mysql
MongoDB
postgres

Soft Skills

Strong Work Ethic
Time Management
Problem-Solving
Team Collaboration
Leadership

Attention to Detail

Frameworks

Spring Boot
Django
Flask
RESTful APIs
GORM
Gin

React

Version Control

Git, Github

System Design

Architecture

Design & Critical Thinking

Projects

Expense Tracker

Languages: Java (Spring Boot), HTML/CSS, JavaScript

Database: MongoDB

Created an expense tracking application with a Java Spring Boot backend and a responsive HTML/CSS

and JavaScript frontend for budget management and financial reporting.

Contact Management System

Languages: Java (Spring Boot), React, JavaScript

Database: mysql

Developed a versatile contact management system with a Java Spring Boot backend and a React frontend for efficient contact information storage and management.

Contact Management App

Languages: Python (Flask)

Developed a contact management system with a Python Flask backend and MongoDB for efficient storage and management of contact information, along with a frontend built using HTML/CSS and JavaScript.

URL Shortener App

Languages: HTML/CSS, JavaScript

Developed a web application to shorten URLs, utilizing HTML/CSS for the frontend design and JavaScript for functionality.

Subscription Payment App

Languages: Golang (Gin, GORM)

Developed a subscription-based payment system using Golang with the Gin framework and GORM with MySQL for managing recurring payments and user subscriptions.

Education

B.sc Computer Science, *Esfam University*
Benin, West-Africa
