

AKINYEMI AYOMIDE BLESSING

Full Stack Developer • Software Engineer • Backend Specialist

✉ akinolablessing1890@gmail.com • ☎ 09155300427 / 07047283300

📍 Sabo, Yaba, Lagos, Nigeria • 🔗 [linkedin.com/in/akinola-blessing-b26a29351](https://www.linkedin.com/in/akinola-blessing-b26a29351) • 🐙 github.com/akinolablessing

PROFESSIONAL SUMMARY

Passionate and results-driven Full Stack Developer with hands-on experience building scalable web applications, RESTful APIs, and real-world fintech solutions. Proficient across the full development stack with expertise in Python (FastAPI, Django), Java (Spring Boot), JavaScript/TypeScript (React), and modern database technologies. Demonstrated ability to architect secure, high-performance backend systems and craft responsive, user-centric frontend interfaces. Adept at solving complex technical challenges and delivering production-ready software with a focus on security, scalability, and clean code principles. Seeking to contribute impactful engineering solutions to innovative and forward-thinking teams.

TECHNICAL SKILLS

Frontend	React, React Native, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Python, FastAPI, Django, Django REST Framework, Java, Spring Boot, Node.js, Express.js
Databases	MySQL, PostgreSQL, MongoDB, SQLite
Tools & DevOps	Git, GitHub, Docker, Postman, REST APIs, JWT Authentication, Cloudinary, Firebase, AWS
Practices	Agile/Scrum, API Documentation, Secure Auth Workflows, MVC Architecture, OOP

TECHNICAL PROJECTS

TransferCheck – Real-Time Transaction Verification Platform

Technologies: Python, FastAPI, MySQL, JWT Authentication, REST APIs

- ▶ Architected and deployed a real-time financial transaction verification platform, reducing potential fraud risk through automated pre-release asset validation workflows.
- ▶ Engineered secure RESTful APIs with JWT authentication, implementing role-based access control and industry-standard security practices.
- ▶ Designed scalable backend architecture with optimized database integration, full API documentation, and automated transaction verification pipelines.
- ▶ Prioritized performance optimization and reliability, achieving consistent transaction processing accuracy across concurrent operations.

ErrandTribe – Errand Service Management Platform

Technologies: Python, Django, Django REST Framework, MySQL, JWT Authentication

- ▶ Developed a full-stack errand management platform connecting customers with service providers, supporting user registration, authentication, order tracking, and profile management.
- ▶ Designed and implemented RESTful APIs using Django REST Framework with secure JWT-based authentication workflows.
- ▶ Engineered scalable database models and business logic to accommodate platform growth and high user concurrency.
- ▶ Improved platform reliability and user experience through efficient backend architecture and modular code design.

GlamBook – Beauty Service Marketplace

Technologies: React, JavaScript, Tailwind CSS

- ▶ Built a fully responsive beauty service marketplace connecting customers with stylists, makeup artists, and beauty professionals across multiple device form factors.
- ▶ Developed modern, mobile-first UI components using React and Tailwind CSS, including portfolio pages, booking flows, and service discovery screens.
- ▶ Implemented reusable component architecture, reducing development time and ensuring design consistency across the platform.

Fintech Fraud Prevention System

Technologies: Python, FastAPI, Machine Learning, REST APIs

- ▶ Built an intelligent fraud detection system that analyzes transaction behavior patterns and flags suspicious activities in real time.
- ▶ Designed and integrated APIs for automated transaction risk scoring and assessment, enhancing monitoring accuracy.

Banking Management System

Technologies: Java, Spring Boot, MongoDB

- ▶ Developed a secure banking application supporting account management, deposits, withdrawals, and transaction history retrieval.
- ▶ Implemented layered service architecture with secure authentication and RESTful API design following software engineering best practices.

EDUCATION

Software Engineering Programme

Semicolon Africa

Sep 2024 – Sep 2025

Lagos, Nigeria

CERTIFICATIONS

- ▶ Programme Completion Certificate – Semicolon Africa (Software Engineering)
- ▶ Certificate of Apprenticeship – MentorLed (Backend Engineer Mentorship Programme)
